[30Day-23-1208]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled "Developmental/Methodologic Projects to Improve the National Health and Nutrition Examination Survey and Related Programs" to the Office of Management and Budget (OMB) for review and approval. CDC previously published a "Proposed Data Collection Submitted for Public Comment and Recommendations" notice on October 21, 2022 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

- (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

- (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (c) Enhance the quality, utility, and clarity of the information to be collected;
- (d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and
- (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639-7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review - Open for Public Comments" or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street, NW, Washington, DC 20503 or by fax to (202) 395-5806. Provide written comments within 30 days of notice publication.

Proposed Project

Developmental/Methodologic Projects to Improve the National Health and Nutrition Examination Survey and Related Programs (OMB Control No. 0920-1208, Exp. 8/31/2023) - Extension - National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes that the Secretary of Health and Human Services (DHHS), acting through NCHS, shall collect statistics on the extent and nature of illness and disability; environmental, social and other health hazards; and determinants of health of the population of the United States. The Division of Health and Nutrition Examination Surveys (DHNES) has conducted national surveys and related projects periodically between 1970 and 1994, and continuously since 1999. The mission of DHNES programs is to produce descriptive statistics which measure the health and nutrition status of the general population. The continuous operation of DHNES programs presents unique challenges in testing new survey content and activities, such as outreach or participant screening.

This Generic Information Collection Request (ICR) covers developmental projects to help evaluate and enhance DHNES existing and proposed data collection activities to increase

research capacity and improve data quality. The information collected through this Generic ICR will not be used to make generalizable statements about the population of interest or to inform public policy; however, methodological findings from these projects may be reported.

The purpose and use of projects under this NHANES Generic Clearance would include developmental projects necessary for activities such as testing new procedures, equipment, technology and approaches that are going to be folded into NHANES or other NCHS programs; designing and testing examination components or survey questions; creating new studies including biomonitoring and clinical measures; creating new cohorts, including a pregnancy and/or a birth-24 month cohort; testing of the cognitive and interpretive aspects of survey methodology; feasibility testing of proposed new components or modifications to existing components; testing of human-computer interfaces/usability; assessing the acceptability of proposed NHANES components among likely participants; testing alternative approaches to existing NHANES procedures, including activities related to improving nonresponse; testing the use of or variations/adjustments in incentives; testing content of web based surveys; testing the feasibility of obtaining bodily fluid specimens (blood, urine, semen, saliva, breastmilk) and tissue sample (swabs); testing digital imaging technology and related procedures (e.g., retinal scan, liver ultrasound, Dual-energy X-ray absorptiometry (DEXA), prescription and over-the-counter

dietary supplements bottles); testing the feasibility of and procedure/processes for accessing participant's medical records from healthcare settings (e.g., hospitals and physician offices); testing the feasibility and protocols for home examination measurements; testing survey materials and procedures to improve response rates, including changes to advance materials and protocols, changes to the incentive structure, introduction of new and timely outreach and awareness procedures including the use of social media; conducting crossover studies; creating and testing digital survey materials; and conducting customer satisfaction assessments.

The types of participants covered by the NHANES Generic may include current or past NHANES participants; family or household members of NHANES participants; individuals eligible to be participants in NHANES, but who did not screen into the actual survey; convenience samples; volunteers; subject matter experts or consultants such as survey methodologist, academic researchers, clinicians or other health care providers; NHANES data or website users; members of the general public or individuals abroad who would be part of a collaborative development project or projects between NCHS and related public health agencies in the U.S. and/or abroad. The type of participant involved in a given developmental project would be determined by the nature of the project. The details of each project will be included in the specific GenIC submissions.

CDC requests a three-year clearance. The estimated annualized burden for this generic data collection is 59,465 hours. There is no cost to respondents other than their time.

Estimated Annualized Burden Hours

Type of Respondents	Form Name	Number of Respondents	Number of Responses per respondent	Average Burden per Response (in hours)
Individuals or Households	Developmental Projects & Focus Group documents	35,000	1	1.5
Volunteers	Developmental Projects & Focus Group documents	300	1	1.5
Individuals or households, Volunteers, NHANES Participants	24-hour developmental projects	200	1	25
NHANES Participants	Developmental Projects	1,000	1	1.5
Subject Matter Experts	Focus Group / Developmental Project Documents	15	1	1
